

**IN THE CLAIMS:**

Please substitute the claims with the following amended claims:

1. (Original) A recording/reproducing apparatus comprising a reservation means for setting up a timer reservation program, a recording means for performing recording operation on the basis of a set-up timer recording program, and an additional reservation means for setting up another timer reservation program while a timer reservation is continuously kept performing.
2. (Original) A recording/reproducing apparatus claimed in Claim 1, wherein said additional reservation means sets up a recording start time on the basis of an end time of a program currently in the course of recording.
3. (Original) A recording/reproducing apparatus claimed in Claim 1, wherein said additional reservation means sets up a new timer reservation program by displaying a timer reservation program currently in the course of recording and correcting said timer reservation program.
4. (Original) A recording/reproducing apparatus claimed in Claim 1, wherein said additional reservation means sets up a timer reservation on the basis of an input code information.
5. (Currently amended) A recording/reproducing apparatus claimed in Claim 1[[Claims 1, 2, 3, or 4]], wherein said additional reservation means sets up a timer reservation program by displaying a timer reservation program currently in the course of recording and correcting said timer reservation program, and said recording means continues recording on the basis of said corrected timer reservation program.

Please add the following new claims.

6. (New) A recording/reproducing apparatus claimed in Claim 2, wherein said additional reservation means sets up a timer reservation program by displaying a timer reservation program currently in the course of recording and correcting said timer reservation program, and said recording means continues recording on the basis of said corrected timer reservation program.

7. (New) A recording/reproducing apparatus claimed in Claim 3, wherein said additional reservation means sets up a timer reservation program by displaying a timer reservation program currently in the course of recording and correcting said timer reservation program, and said recording means continues recording on the basis of said corrected timer reservation program.
8. (New) A recording/reproducing apparatus claimed in Claim 4, wherein said additional reservation means sets up a timer reservation program by displaying a timer reservation program currently in the course of recording and correcting said timer reservation program, and said recording means continues recording on the basis of said corrected timer reservation program.
